COMPLETELY RECYCLABLE AND ENVIRONMENTALLY FRIENDLY ARTIFICIAL GRASS

Completely recyclable and environmentally friendly artificial grass
is a type of synthetic turf that is designed to be sustainable, eco-friendly and easily recyclable.

It is safe for children and pets to play on and does not release any harmful pollutants into the air or water.

It can also be customized to suit a variety of applications, such as sports fields, landscaping, and playgrounds. Different pile heights, densities, and colors can be used to create a natural-looking and functional surface for any application.

Features

- No coating
- Environmentally friendly
- 100% recyclable
- Excellent water permeability

Requirements
