PET

Artificial Turf

Pet artificial turf is specially designed for pets. It is durable and safe for all family members and pets. With natural grass, animal urine makes the whole yard smell bad. Besides, dirt also makes animals a mess. If the turf is poor quality, it not only affects the pets' playing environment, but also the hygiene in the yard.

When using artificial turf, turf deodorant is provided at the bottom of the turf during the installation to help your turf always fresh and odorless, making your pet free from rolling around in the dirt.

Requirements

Grass fiber material

Soft PP and PE

Infill

Non-toxic, anti-bacteria infills are used to prevent the accumulation of bacteria.

Grass fiber structure

A combination of straight grass fibers and thatch increases the softness of the turf.

Backing

Good water permeability backing ensures pet urine completely drains out.

Pile height

Short grass fiber ensures users can clean solid wastes quickly.

Recommendations

Pet artificial turf structure with a mixture of monofilament grass fibers and thatch

Artificial turf structure

Height:	Gauge:	DTEX:	Density
20-60 mm	3/8"	6500-14000	16800-25200 (tufts/m ²)

Backing

- PP + PP + grid backing
- PP + PET + grid backing
- PP + non-woven fabric + grid backing

Coating

- Eco-friendly, recyclable coating
- Recyclable non-adhesive coating
- PU coating
- SBR coating

Grass Fiber Recommendations

Pet artificial turf structure with thatch

Artificial turf structure

Height:	Gauge:	DTEX:	Density
10-20 mm	3/16", 1/4", 3/8"	4400-10000	29400-71400 (tufts/m ²)

Backing

- PP + PP + grid backing
- PP + PET + grid backing
- PP + non-woven fabric + grid backing

Coating

- Eco-friendly, recyclable coating
- Recyclable non-adhesive coating
- PU coating
- SBR coating

Grass Fiber Recommendations
